

Plucking Fingers

Plucking or de-feathering is more than just removing the feathers. The mechanical action of the plucking fingers on the product has consequences for the physiological quality of the meat.

Over the years Goodlife Elastomer (M) Sdn Bhd (GLE) has constantly striven for developments and improvements to perfect the plucking process. Plucking fingers are the latest results of our thorough research where stringent quality control is always our top priorities during the manufacturing stage.

These plucking fingers have passed the ROHS and Rubber Research Institute of Malaysia (RRIM) tests to ensure it's quality standards. We have various sizes and specifications to suit your needs depending on the type of your de-feathering machines. GLE's plucking fingers have also been proven to be affordable and longer lasting compared to other normal grade rubber fingers in the market.

Summary of the benefits of GLE's plucking fingers:

- Made out of high quality natural rubber
- Optimal plucking results
- Reduced maintenance cost
- Longer lasting and easy cleaning
- More Affordable
- Environmental friendly
- Certified food grade and hygienic
- Improved user friendliness
- Improved technological adjustment
